BOT ERP

BOT Solutions ERP is among the best ERP in today's world as we reduce the manual working and time consumption. We transform the business world into digital work. Our ERP is being used by the best industries and organizations in Saudi Arabia. We manage day to day activities by providing software for accounting, inventory, management etc. Our ERP is specially designed and is compatible to all the Operating Systems. We allow the management and the stakeholders to have a complete trust in data secrecy. We streamline all the process and information into one framework where you can easily work

FEATURES

-  Multiple Business Management
-  Product management
-  Purchases
-  Multiple sale & POS terminals
-  Suppliers & costumers
-  Staff, sales person
-  Multiply prices groups

BOT CRM AND PROJECT MANAGER

BOT CRM is complete Customer Relationship Management software that is a great fit for almost any company, freelancer or many other uses. With it's clean and modern design, BOT CRM can help you look more professional to your customers and help improve business performance at the same time. It helps create good looking proposal and invoices for leads or customers and increase sales. Receive notification when proposal is accepted/declined and auto send thank you email to your customer after accepting the proposal

FEATURES

-  Projects
-  Invoices
-  Subscriptions
-  Estimates
-  Proposals
-  Expenses
-  Payments
-  Lead Management

CRMs need to focus on customers and BOT CRM does that with a powerful support system that helps you track and resolve issues quickly via the integrated ticket system and customer reminders. Assign reminders to yourself, one or many staff members and with one click, reminders can be sent to email and in-app notification system. These features and more can take costumers to the next level.
