ABOUT APP:

Parlour can tell there clients to download the app and get your reservation through the app! It would be easy 1 click download and 2 step client registration! Clients would open the app and check for the availability and would select the time suitable for him/her and can tell the parlour through app that what the services he/she needs are! So the customer would not have to wait inside the parlour! They can hit the parlour at given time and get there services!

Solutions

HOWS IT WORK

Parlour can mention within the app that how many employees they have and what is there speciality!

Parlour can mention within the app that how many employees they have and what is there speciality!Time would be automatically assigned to the customer by app depending on the services!

Parlour would receive the notification from client through admin panel! And admin should accept and decline the reservation depending on availability if they want to! Else they can also put it on automatic reservations during working hours!

APPOINTMENT

Customer can easily choose the time for the services through app according to there schedule or when ever they are free to visit the parlour or manage there time according to the reservation they got and show up to the parlour 5 mints before the reservation time and savethere time plus there would be a less chances to get affected by any kind of virus like covid 19.

PAYMENT

Customer can pay at the time of reservation through bank or after the visit! But if customer is paying in advance parlour can offer them some discount if admin wants!
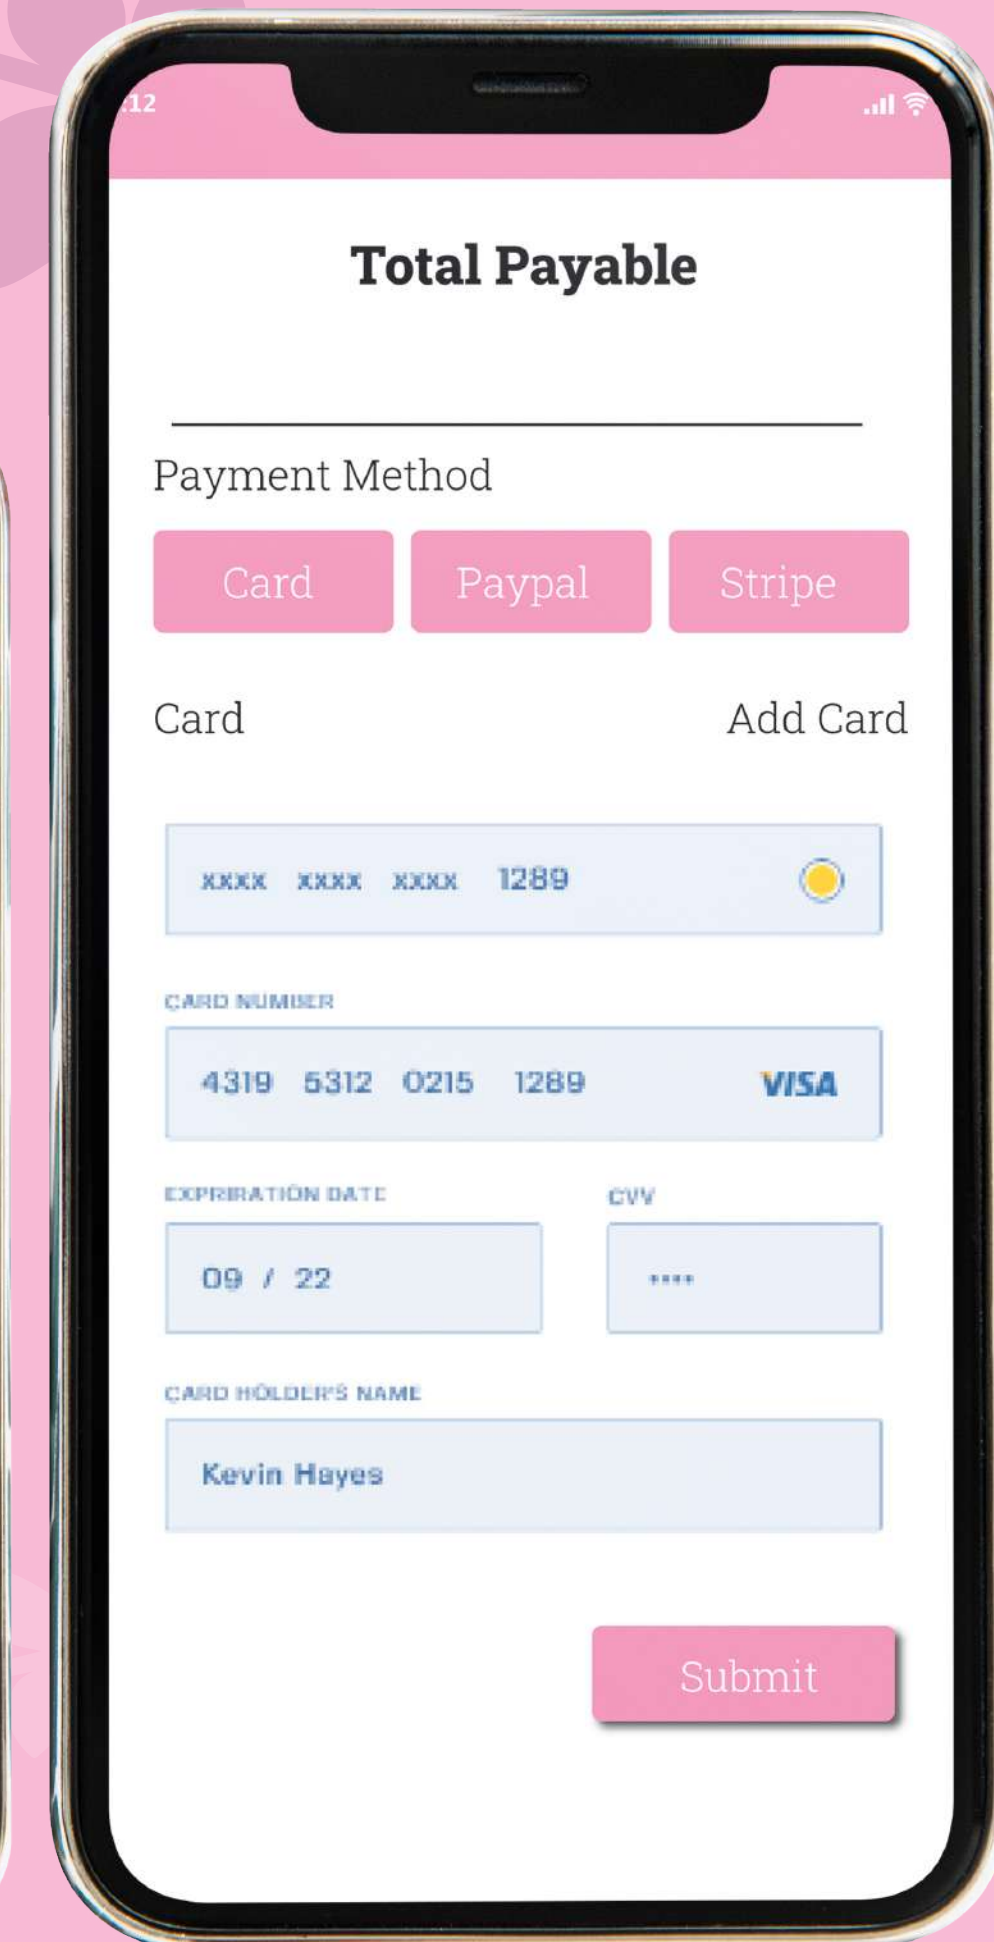

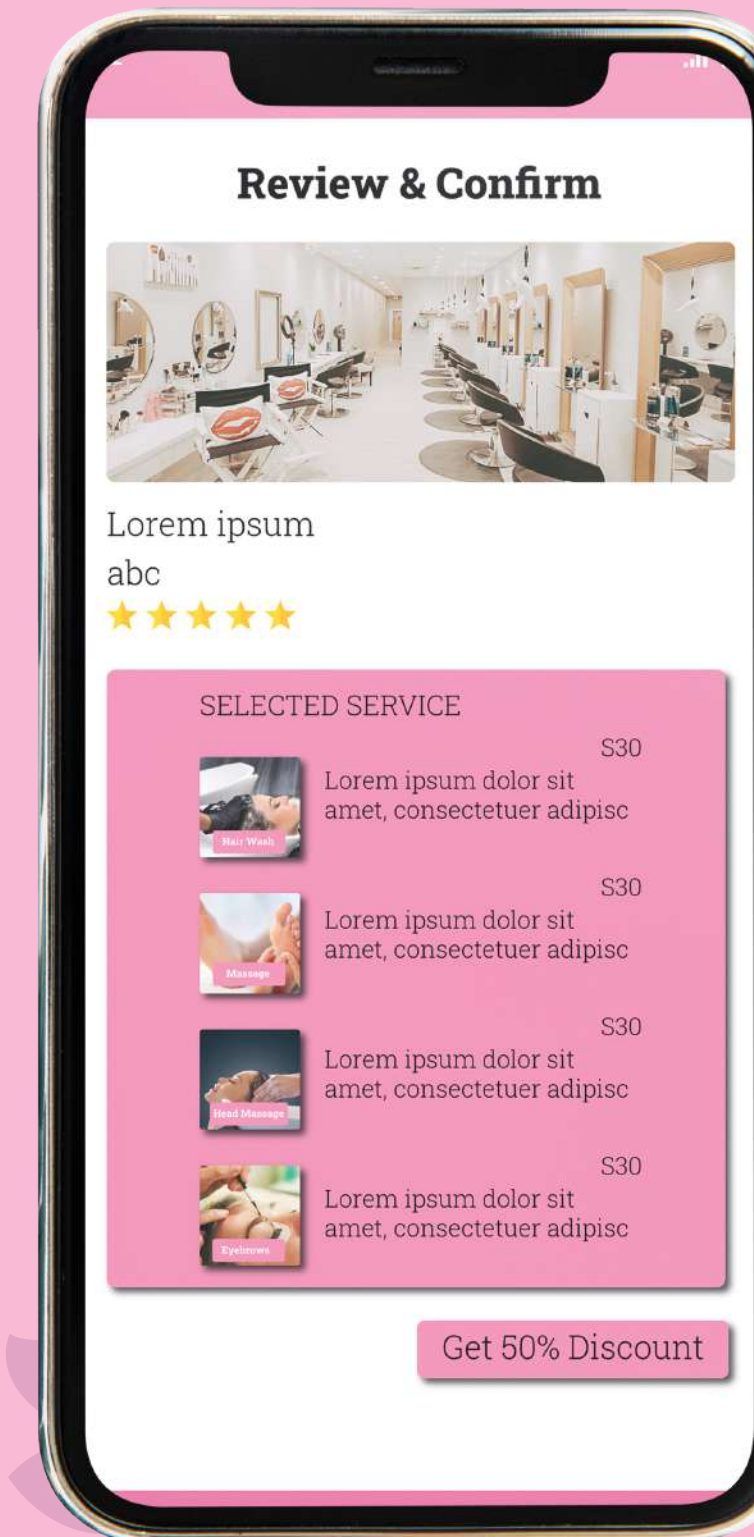

On every service customer is getting through app system would assign the customer some points depending on the cost of the services and later customer can get discounts for those points or avail some free treatment from the parlour!

SELECT DATE & TIME

Ease of access and customer management through application and the point system will increase the continuity of there clients and reference point system would give them more and more clients every day!
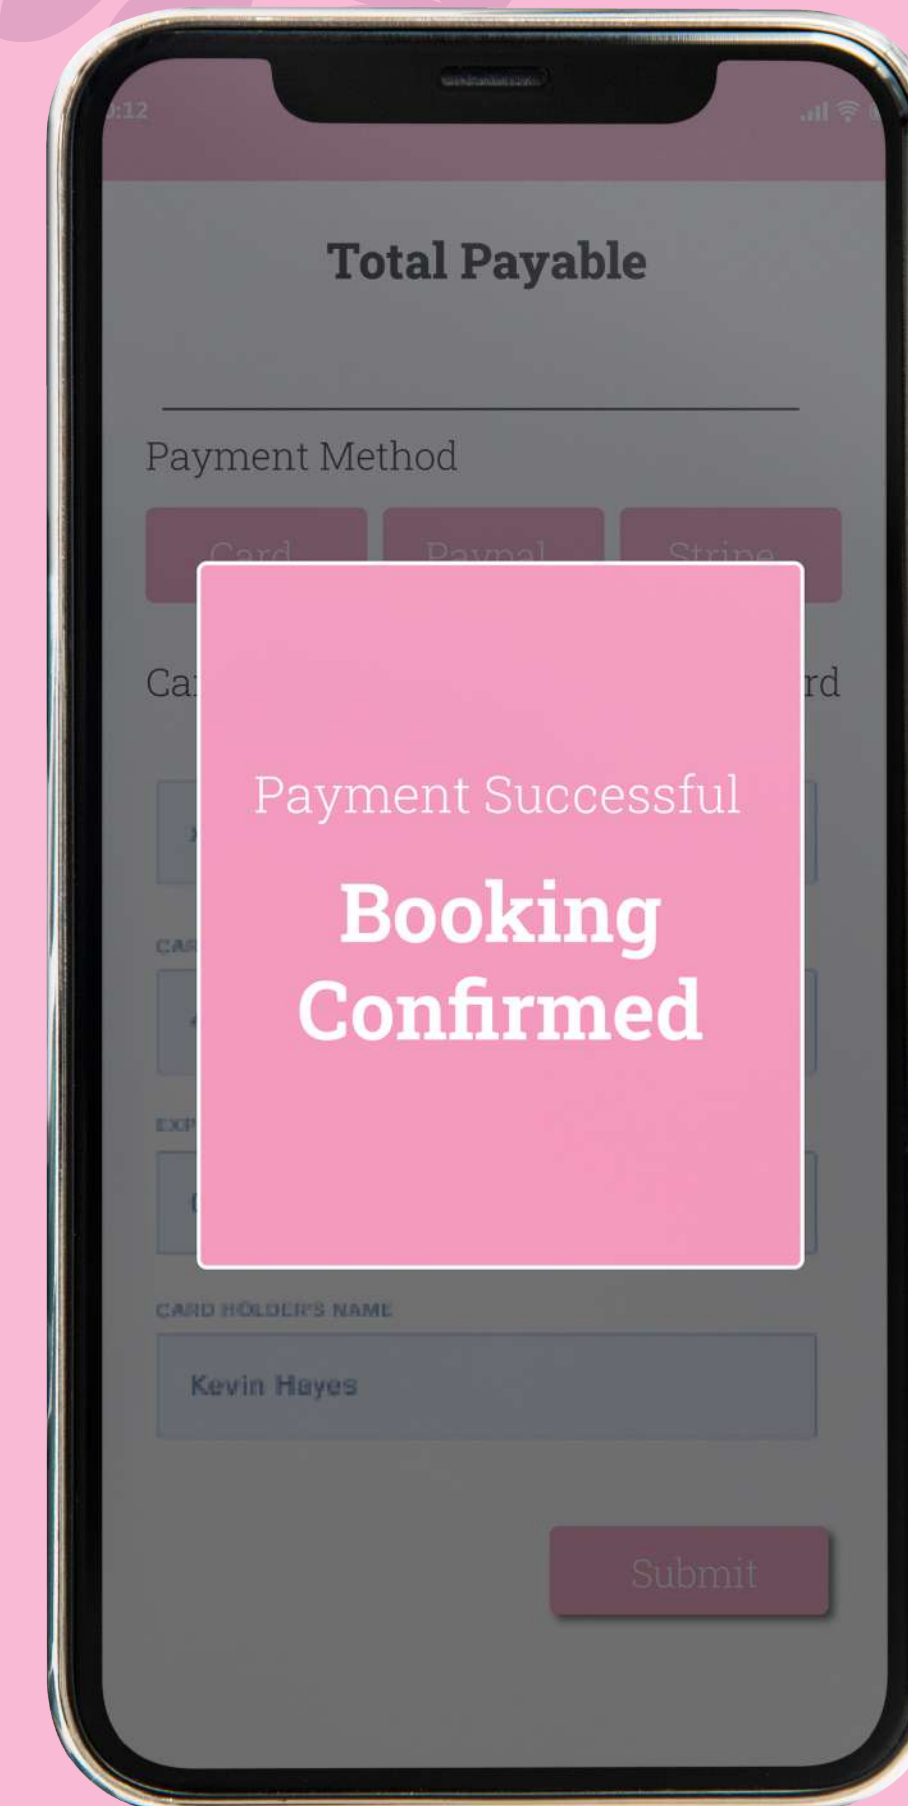

Customer can easily choose the time for the services through app according to there schedule or when ever they are free to visit the parlour or manage there time according to the reservation they got and show up to the parlour 5 mints before the reservation time and savethere time plus there would be a less chances to get affected by any kind of virus like covid 19.
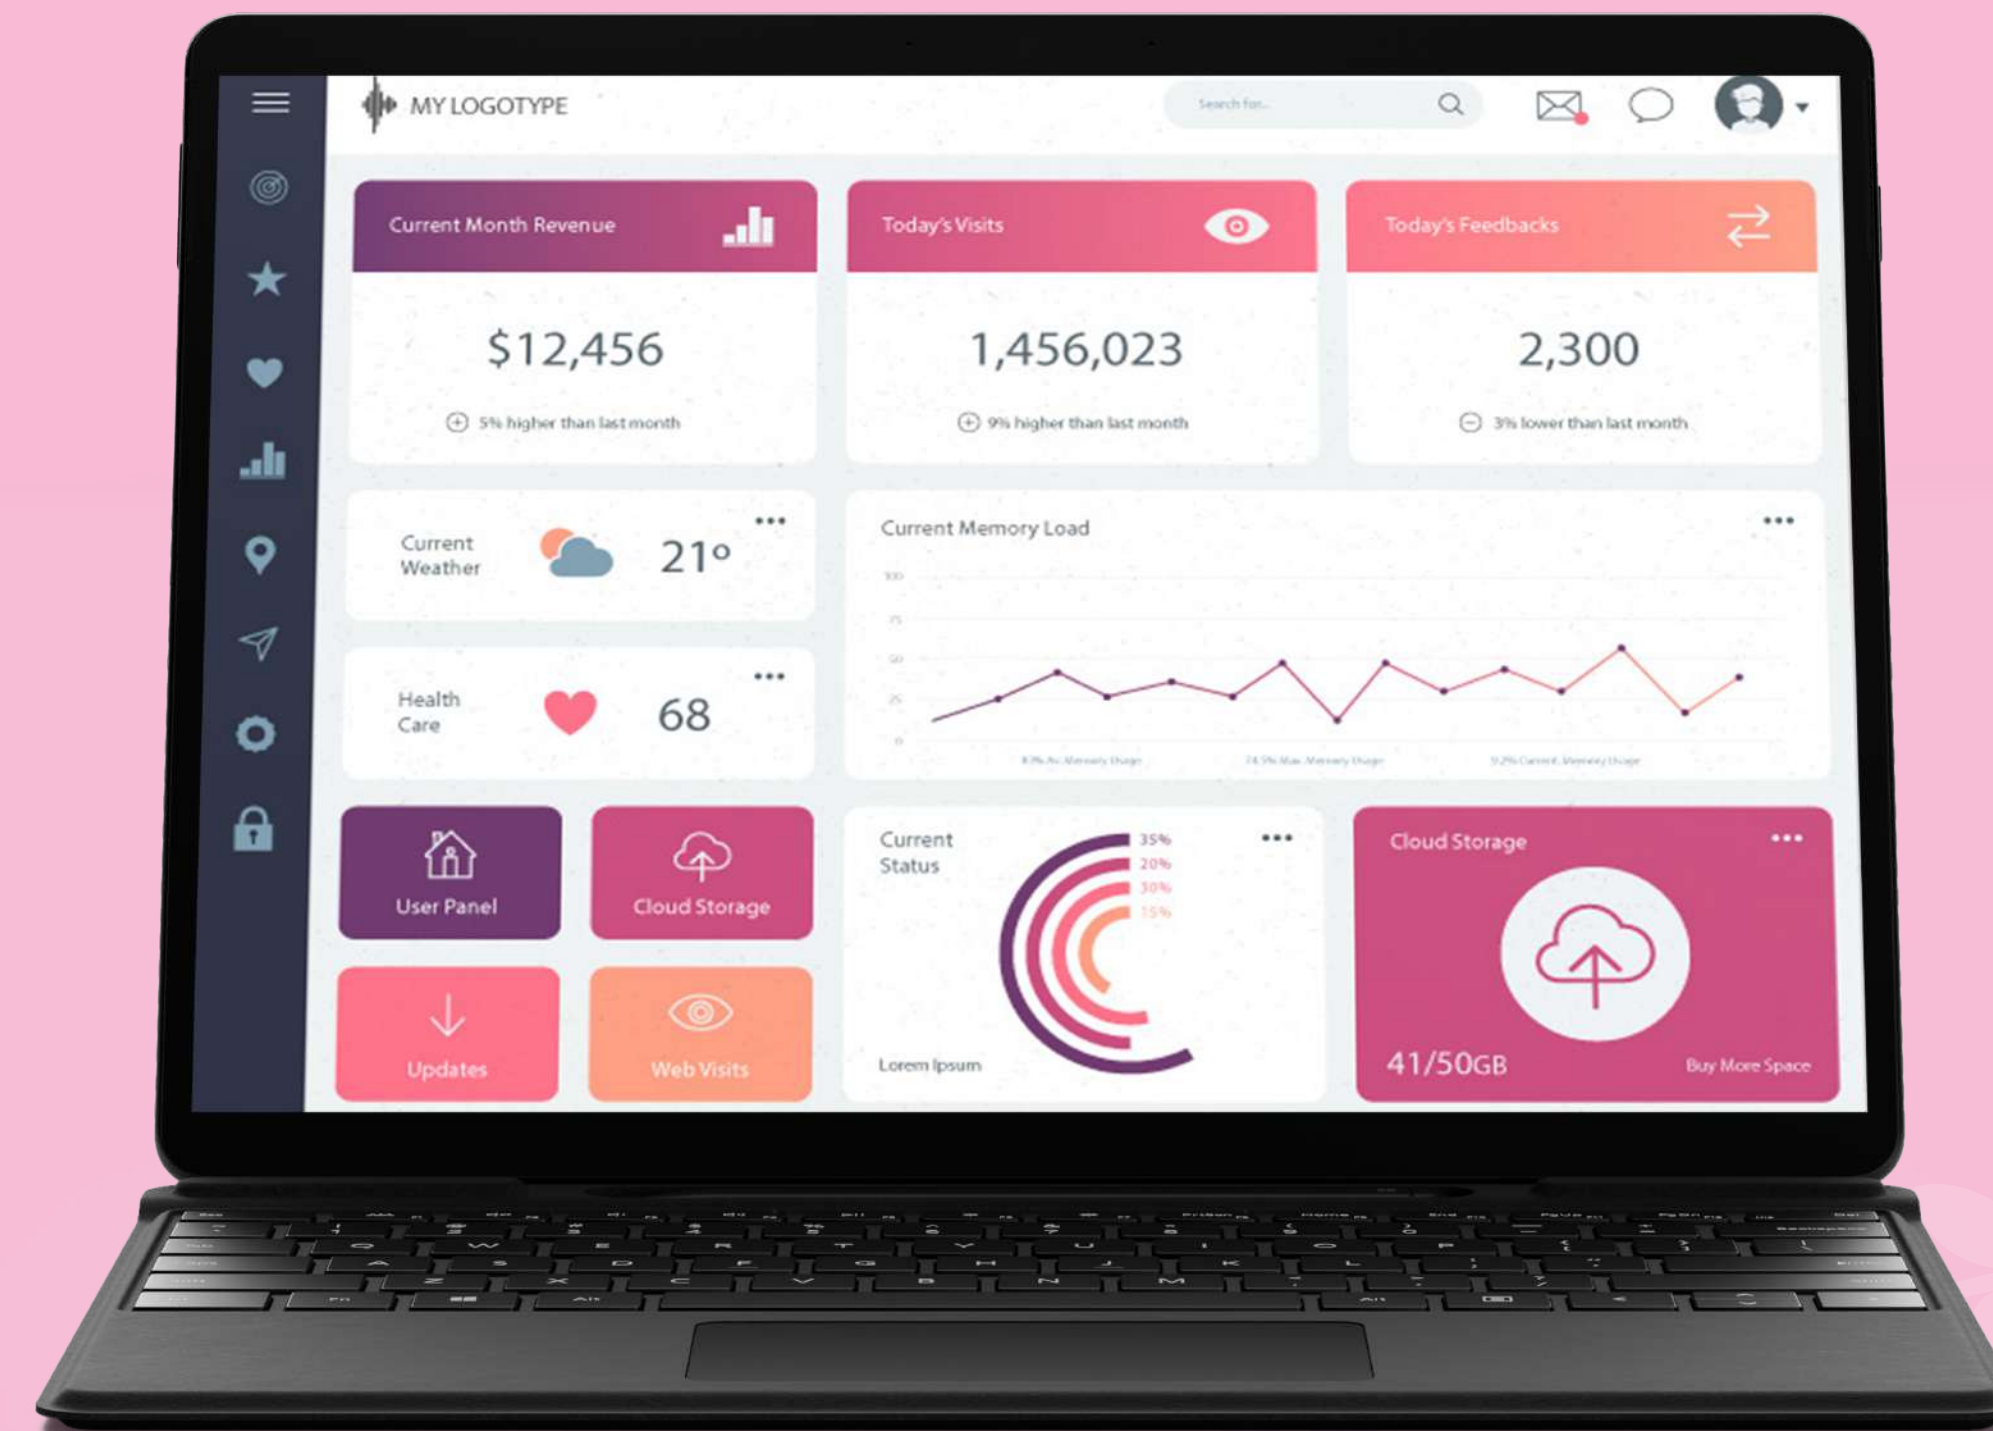

BUSINESS BOASTER

Through this app parlours would have many new clients through the point reference system and new client would be your permeant client by watching the discounted services you are providing through app.

People spend loads of money for social media marketing but through this app you don't need any social media marketing. App its self would work as a marketing tool once your pre existing clients starts to download it in there phones. Customers can also rate your employees through the app that weather they took good care of them or not and at the end of month you can have an overlook on your employees performance through the customer feed backs.

ADMIN DASHBOARD

The Most Comprehensive Admin

ADMIN PANEL

Parlour would receive the notification from client through admin panel! And admin should accept and decline the reservation depending on availability if they want to! Else they can also put it on automatic reservations during working hours! If customer cancels the post appointment, system would automatically assign that window of time to someone else! If customer doesn't shows up on the given time, a pop would emerge on admin screen after 10 mints whether the customer showed up or not and if admin tells system that customer didn't showed up, system would assign different time to the customer according to availability and notify the customer through the app notification system!
